ABSTRACT

This is the tenth in the fourth series of general bibliographies developed to disseminate information on documents analyzed at the ERIC Information Analysis Center for Science and Mathematics Education. Reported are 59 citations of selected documents related to characteristics of teachers and students of science and mathematics. The documents include research reports, research reviews, manuals, speeches, textbooks, and other document types. Entries are listed in alphabetical order by author under teacher characteristics and student characteristics. An author index is provided. Citations include author, source, availability, and major ideas of the document. This bibliography updates, but does not replace, bibliographies 10, 20, and 30. (RR)

SCIENCE AND MATHEMATICS EDUCATION INFORMATION REPORTS

The Science and Mathematics Education Information Reports are being developed to disseminate information concerning documents analyzed at the ERIC Information Analysis Center for Science and Mathematics Education. The reports include four types of publications. General Bibliographies are being issued to announce most documents processed by the Information Analysis Center for Science and Mathematics Education. These bibliographies are categorized by topics and indicate the availability of the document and the major ideas included in the document. Special Bibliographies are being developed to announce availability of documents in selected interest areas. These bibliographies will list most significant documents that have been published in the interest area. Guides to Resource Literature for Science and Mathematics Teachers are bibliographies that identify references for the professional growth of teachers at all levels of science and mathematics teaching. Research Reviews will be issued to analyze and synthesize research related to science and mathematics education over a period of several years.

The Science and Mathematics Education Information Reports will be announced in the SMAC Newsletter as they become available.

GENERAL BIBLIOGRAPHIES

The General Bibliographies are being developed to announce the documents acquired and processed by the ERIC Information Analysis Center for Science and Mathematics Education. The bibliographies will focus on general topics. This bibliography announces most documents related to the topic that was included in the fourth 2,000 documents processed by this Center. It supplements General Bibliographies 10, 20, and 30. Additional supplements will be issued as documents are processed.

USING BIBLIOGRAPHIC CITATIONS

All documents are listed by similar bibliographic citations. A sample citation is explained for your convenience. You will find it helpful to study the explanation of the sample citation before using this bibliography.

SAMPLE OF BIBLIOGRAPHIC CITATION

EXPLANATION OF BIBLIOGRAPHIC CITATION

(1) SE 004 904

This is the Science and Mathematics Education Center's identification number for the document. It serves as the name for the document and provides a way of locating the material.

(2) HELGESON, STANLEY L.

The principal author, editor, or organization associated with the writing of the document is listed.

(3) LESSON PLANS AND TESTS OF KNOWLEDGE, COMPREHENSION, AND APPLICATION FOR INSTRUCTION IN CONCEPTS OF FORCE, GRADES 2-6

Title of document.

(4) UNIVERSITY OF WISCONSIN, MADISON, RESEARCH AND DEVELOPMENT CENTER

This indicates where the document was obtained by the Center.

(5) EDRS

Field five indicates the source of the document. If the document is available from the ERIC Document Reproduction Service (EDRS) it can be ordered.

(6) ED 020 907 MF $0.25 HC $2.35

If a document is announced in Research in Education, the ED number of the document is indicated in this space. If the document is available from EDRS the price of the document is also indicated in this field. MF indicates microfiche and HC indicates hardcopy. This document would cost $0.25 in microfiche or $2.35 in hardcopy.

(7) 03 00 68

This field designates the publication date of the document (March, 1968). The first set of two numerics represents the month; the second, the day of the month; and the third, the year. In most cases the date is obtained from the document. In a few cases, when no date of publication is on the document, the date is estimated based on the best information available in the document.

(8) 45

Field eight identifies the number of pages in the document. This document contains 45 pages. Use of this field will provide information concerning the length of the document.

(9) *ELEMENTARY SCHOOL SCIENCE, *FORCES (PHYSICAL), *INSTRUCTION, *PHYSICS, *TEACHING GUIDES, ACADEMIC ACHIEVEMENT, COGNITIVE PROCESSES, CONCEPT FORMATION, EVALUATION, LEARNING, PHYSICAL SCIENCES, TESTS, RESEARCH REPORTS

This field provides an indication of the ideas included in the document. Each term, such as *INSTRUCTION, has been selected by an information analyst because the term is important for the identification of the document. Terms marked with an asterisk represent primary ideas in the document; the other terms represent ideas of lesser importance. You can use this information to narrow the number of documents you want to review.
